The Year of Darwin 2009

Discovering Darwin at NOAA Central Library: Resources on Charles Darwin, Evolution, and the Galapagos Islands: A Selected Bibliography

Prepared by Anna Fiolek and Kathleen A. Kelly

U.S. Department of Commerce
National Oceanic and Atmospheric Administration
National Environmental Satellite, Data, and Information Service
National Oceanographic Data Center
NOAA Central Library
October 2009

<http://www.lib.noaa.gov/researchtools/subjectguides/darwinbib.pdf>

Contents:

Preface	p. 3
Acknowledgment	p. 4
I. Darwin Chronology	p. 5-6
II. Monographic Publications By or About Charles Darwin in the NOAA Central Library Network Catalog (NOAALINC)	p. 7-13
III. Internet Resources Related to Charles Darwin And His Science (Including online images and videos)	p. 14-17
IV. Darwin Science-related Journals in the NOAA Libraries'..... Network	p. 17-18

Preface

This *Bibliography* has been prepared to support NOAA Central Library (NCL) outreach activities during the Year of Darwin 2009, including a “Discovering Darwin at NOAA Central Library” Exhibit. The Year of Darwin 2009 has been observed worldwide by libraries, museums, academic institutions and scientific publishers, to honor the 150th anniversary of *On the Origin of Species* and the 200th anniversary of Charles Darwin’s birth. This Bibliography reflects the library’s unique print and online resources on Charles Darwin, Evolution, and the Galapagos Islands. It includes citations organized “by title” from NOAALINC, the library’s online catalog, and from the library’s historical collections. The data and listings are comprehensive from the 19th century to the present. The formats represented in this resource include printed monographs, serial publications, graphical materials, videos, online full-text documents, a related journal list, and Web resources.

The *Bibliography* is also published online under Library and Information Services Division (LISD) Current Reference Series 2009-1, and is available to the international community via NOAA Central Library’s web site and its online catalog NOAALINC. This *Bibliography* may also serve as an Internet locator for printed and online resources in evolutionary biology, and the biology and ecology of the Galapagos Islands of Ecuador. Any comments and suggestions for edits are welcomed.

Any publications listed in this *Bibliography* which are not designated as Rare Books may be requested through your local library’s Interlibrary Loan (ILL) service.

This publication is available online for downloading in PDF format at:
<http://www.lib.noaa.gov/researchtools/subjectguides/darwinbib.pdf>

Acknowledgment

This *Bibliography* would not have been possible without the assistance of many individuals at the NOAA Central Library and the National Oceanographic Data Center (NODC): Neal Kaske, Chief of the Library and Information Services Division (LISD); Skip Theberge, Acting Head of Reference Services for his assistance with selection and loan of books; Diana L. Abney, Librarian for coordinating an imaging process of the selected documents; Li Zhang, Librarian for cataloging selected Darwin-related publications; Kelly Logan, NODC Outreach Specialist and Sheri Phillips, NODC Marine Biologist for production of an exhibit poster and banner; Jennifer Taylor, Library Technician for assistance with organizing materials for the library's exhibit; and my co-author, Librarian Kathy Kelly, for initiating and managing the project, and assisting with compiling this *Bibliography*.

Finally, special thanks go to the NOAA Climate Data Modernization Program (CDMP) for including Darwin-related documents in their funded ocean heritage scanning projects, and HOV Services for imaging the documents.

I. Darwin Chronology

(From: The Victorian Web: Charles Darwin, at: http://victorianweb.org/science/darwin/darwin_chron.html)

1809 - 12 February Born at Shrewsbury.

1818 - Begins schooling at Shrewsbury School.

1825-27 - Attends Edinburgh University.

1827 - 27 March Contributed two scientific papers to the radical student Plinian Society.

1827-31 - Attends Christ's College, Cambridge University.

1829 - Entomological tour of northern Wales with Prof. F.W. Hope.

1831 - August Geological tour of North Wales with Prof. Adam Sedgwick.

1831 - 29 August Receives letter with offer to sail on H.M.S. Beagle.

1831 - 27 December H.M.S. Beagle sails from Devonport.

1832 - 23 September Darwin finds his first significant fossils.

1835 - September studies the natural history of the Galapagos Islands.

1836 - 2 October H.M.S. Beagle returns to England.

1837 - 31 May Reads his theoretical paper on coral reef formation to London Geological Society.

1837 - Begins first notebook on "*Transmutation of Species*".

1838 - July Begins further notebooks on man and materialism.

1838 - September First formulates theory of evolution by natural selection.

1839 - 29 January Marries cousin Emma Wedgwood.

1842 - Published [*The structure and distribution of coral reefs.*](#)

1844 - Robert Chambers' [*Vestiges of the Natural History of Creation*](#) published anonymously. Darwin published [*Geological Observations on the Volcanic Islands, visited during the voyage of H.M.S. Beagle.*](#)

1845 - Publishes *Journal of Researches into the Natural History and Geology of the Countries visited during the Voyage of H.M.S. Beagle round the World.*

1846 - Begins eight-year study of barnacles. Publishes *Geological Observations on South America.*

1858 - 18 June Receives letter from Alfred Russell Wallace discussing very similar theory of evolution prompts Darwin to go public at last.

1858 - July Papers by Darwin and Wallace, announcing theory of evolution through natural selection, read in absentia at Linnaean Society, London.

1858 - 20 July Begins writing *Origin of Species*.

1859 - 19 March Finished writing Origin of Species.

1859 - 24 November *Origin of Species* published, all 1,250 copies sold on first day.

1865 - Publishes *The Movements and Habits of Climbing Plants.*

1868 - Publishes *The Variation of Animals and Plants under Domestication.*

1871 - Publishes *The Descent of Man.*

1872 - Publishes *The Expression of the Emotions in Man and Animals.*

1876 - Publishes *The Effects of Cross and Self Fertilisation in the Vegetable Kingdom*

1877 - Publishes "A Biographical Sketch of an Infant" & *The Different Forms of Flowers on Plants of the Same Species.*

1881 - Publishes *The Formation of Vegetable Mould Through the Action of Worms, with Observations on Their Habits.*

1882 - Dies at Down House, buried in Westminster Cathedral.

Contents: In praise of Charles Darwin / Stephen Jay Gould -- The human mind after Darwin / Irving Stone -- African origins / Richard Leakey -- The evidences of evolution / Sir Peter Medawar -- Sociobiology / Edward O. Wilson -- Darwin's legacy / Jaroslav Pelikan -- Conversations at Nobel XVIII.
GN281 .N6 1982

Desmond, Adrian and James Moore. 2009. **Darwin's sacred cause: how a hatred of slavery shaped Darwin's views on human evolution**. Boston: Houghton Mifflin Harcourt.

Abstract: There is a mystery surrounding Darwin: How did this quiet, respectable gentleman, a pillar of his parish, come to embrace one of the most radical ideas in the history of human thought? Darwin risked a great deal in publishing his theory of evolution, so something very powerful--a moral fire--must have propelled him. That moral fire, argue authors Desmond and Moore, was a passionate hatred of slavery. They draw on a wealth of fresh manuscripts, correspondence, notebooks, diaries, and even ships' logs to show how Darwin's abolitionism had deep roots in his mother's family and was reinforced by his voyage on the Beagle as well as by events in America. Leading apologists for slavery in Darwin's time argued that blacks and whites were separate species, with whites created superior. Darwin believed that the races belonged to the same human family, and slavery was therefore a sin.--From publisher description.

Dobbs, David. 2005, 1st ed. **Reef madness: Charles Darwin, Alexander Agassiz, and the meaning of coral.** New York: Pantheon.

Abstract: This book examines, from a number of perspectives, a period of change in the nature of scientific thought, as represented in the 19th century debate over the formation of coral atolls and reefs between Charles Darwin and Alexander Agassiz, the son of Darwin's great opponent Louis Agassiz. Though the son opposed his father in siding with Darwin's theory of evolution, he made it his life's work to disprove Darwin's theory on coral; while ultimately shown to be incorrect, Agassiz's work laid the foundations of modern oceanography.

Contents: Magpie -- Neuchâtel -- Freiburg -- Cambridge -- Fixity -- Transmutation -- Selection -- A still greater sorrow -- The pleasure of gambling -- To light: Murray's reefs -- A question of science -- Accrual -- "A conspiracy of silence" -- To sea -- The last archipelago -- A connected account -- Eniwetok.

Darwin Correspondence Project home page. 2007. University of Cambridge. "The Darwin Correspondence Project was founded in 1974 by an American scholar, Frederick Burkhardt, with the aid of Sydney Smith, a zoologist in the University of Cambridge (UK). They originally set out to locate, research, and publish summaries of, all letters written by Charles Darwin, the most celebrated naturalist of the nineteenth century. (1809-82). Following a pilot project, it was decided to include letters written to Darwin also - an unusual step for a collection of correspondence at the time, and one now widely followed - and to publish complete transcripts in chronological order. Since then, the Project has had a staff of researchers and editors in both the UK and US, those in the UK being based in Cambridge University Library which houses the largest single collection of Darwin's manuscripts, and his own library of books and journals. The papers include around 9,000 letters."

IV. Darwin Science-related Journals in the NOAA Libraries' Network (<http://www.swetswise.com/direct.do>)

Evolution-related Journals (selection):

- Annual Review of Ecology, Evolution and Systematics*
- Ethology, Ecology and Evolution* (open access, 1994-present)
- Evolution* (full-text through BioOne 2000-present; 1947-2005 via JSTOR)
- Molecular Biology and Evolution* (available at various NOAA libraries)
- Open Evolution Journal* (open access, 2007-present)
- Science* (available at various NOAA libraries)
- Trends in Ecology and Evolution* (available at various NOAA libraries)

Ecology/Marine Biology-related Journals (selection):

- Ecological Applications* (available at various NOAA libraries)
- Ecological Modelling* (available at various NOAA libraries)
- Ecology* (available at various NOAA libraries)
- Ecology and Society* (open access, 1997-present)

Marine Biology (available at various NOAA libraries)
Marine Ecology Progress Series (available at various NOAA libraries)
Marine Ecosystems and Management (open access, 2007-present)
Marine Environment Research (available at various NOAA libraries)
Marine Fisheries Review (open access, 1979-present)
Marine Policy (available at various NOAA libraries)
MPA News (open access, 1999-present)
Ocean and Coastal Management (available at various NOAA libraries)
Oceanography (available at various NOAA libraries)
Oceanus (available at various NOAA libraries)
Science (available at various NOAA libraries)
